

WHERE CARE MEETS RESEARCH

An integrated clinical research site network, embedded inside operating behavioral-health facilities and purpose-built to enroll and retain.

20,000+

PATIENTS IN NETWORK

400

DOMICILED BEDS

6

RESEARCH-READY SITES

24/7

CLINICAL STAFFING

THREE WAYS TO WORK WITH US

RUN YOUR STUDY AT OUR SITES

Place your protocol in our network. We provide the site, investigators, coordinators, and the patient population. One contract, one point of accountability.

PATIENT SOURCING & REFERRAL

Already have sites? We identify and pre-screen eligible candidates from our network and refer them to your locations with full consent and clean documentation.

FULL-SERVICE CONDUCT

From feasibility review through database lock: recruitment, screening, visit conduct, retention, and close-out managed end to end.

WHY IT WORKS

- ◆ **Recruitment from within.** Participants come from characterized patient populations already engaged in daily care at our facilities, not from advertising. Histories are verified before screening.
- ◆ **Retention by design.** Residential settings with 24/7 clinical staffing hold the populations most likely to miss visits. Psychiatric and addiction cohorts stay engaged and observed.
- ◆ **Activation in weeks, not quarters.** One organization owns the facilities, employs the clinical teams, runs the matching technology, and signs the contract.
- ◆ **Technology-backed feasibility.** Our platform continuously matches the live patient census against every recruiting protocol in our indications. Feasibility answers are counts, not guesses.

THERAPEUTIC FOCUS

Behavioral health and CNS: major depressive disorder, generalized anxiety, PTSD, bipolar disorder, schizophrenia, and substance-use disorders (alcohol, opioid, stimulant, cannabis), including inpatient and residential protocols that conventional outpatient sites cannot hold.

LEADERSHIP

Clinical development strategy is led by **Emmanuel Fombu, MD, MBA**: 80+ Phase 1–4 trials at leading pharmaceutical companies, with sponsor, CRO, and site experience. Recognized with the Novartis President's Award for Innovation.
